Fingershield

Where there's a door there's danger

With 28,000 finger trapping accidents each year and personal injury claims costing on average £10,597 there has never been a greater need for Fingershield door protection products. The fingershield device was developed in 1999 as a solution to prevent finger trapping. In recent years, the need to install child door safety products has been increasingly recognised by Health and Safety professionals.

Finger-trapping accidents are not only painful and distressing for the victim but also those who witness the accident and have to provide aftercare. Unfortunately, to make matters worst, with an escalating compensation culture, there have been many reported incidents of personal claim injury claims being logged. To find out more, please click on 'Health and Safety' on the home page of our website or call us.

Baby changing units

Fold away design provides a safe changing facility with a neat, aesthetic appearance when not in use. These are new models, they're now available in two colours – White Fleck or Oatmeal please specify your preference when ordering

Safety and security

Products and services you can trust

Protecting buildings, records and our history is vital. Even more important is the protection of peoples lives.

Our leading fire protection system has been in operation for over 100 years and has a fire safety package specifically designed for CPS customers, featuring suitable products and services - available at specially discounted prices.

More effective than water

- 6 litre Hydrospray Extinguisher

With its specially developed additive and advanced spray nozzle, the lightweight Hydrospray is 60% more effective than a conventional water extinguisher, and size for size more manageable. It's ideal for paper, fabric and wood fires.

- 2kg CO₂ Extinguisher

Highly effective against flammable liquid and electrical hazard fires, without damaging delicate materials or equipment.

Expert Assistance

If you would like advice on how best to protect your premises from fire, CPS will carry out a free, no obligation inspection making detailed recommendations.

Guarantees

All extinguishers and fire blankets are Kitemarked and guaranteed for five years.

Equipment

- Special prices for CPS customers
- All equipment supplied conforms to BSEN3 (European standard)
- All CPS Fighting Equipment comes with a 5 Year Guarantee providing annual servicing is carried out by British Standard approved engineers.
- The CPS fire Scheme offers FREE of CHARGE surveys and advice on existing equipment and additional requirements.

Maintenance Agreements

- No extras - no hidden charges
- Fixed price per extinguisher serviced
- Annual Service INCLUSIVE OF ALL SPARES AND REFILLS
- All CPS fire servicing activities are regularly audited by BSI inspectors to provide independent assurance of quality of service.
- CPS Fire Services Engineers are qualified by FETA (Fire Extinguisher Trades Association) having taken both theoretical and practical examinations.

Fire safety

Service Contracts

Your fire protection equipment will only function effectively in an emergency if it has been properly maintained and regularly serviced.

CPS provides dependable and comprehensive service cover for a fixed price.

All servicing work is carried out to the appropriate British Standards by CPS's team of highly trained service engineers, locally based throughout the country.

Fire safety

All service costs are £6.00 + VAT per extinguisher with a minimum charge of £12.00 + VAT. Under the above service plan the prices quoted include the supply of refills and spares (where due to normal usage).

*Dry Powder Extinguishers are designed for Kitchen and Boiler Room areas and should not be used in Church interiors.

The CPS Dorgard is a safe, legal and cost effective device used to safely hold fire doors open until the fire alarm sounds!

Cost effective

CPS Dorgard is a battery operated device simply fitted to the bottom of fire doors. Therefore it does not require complex and expensive wiring to the fire alarm system.

Simple operation

CPS Dorgard is designed to listen for sounds in excess of 65dB which is the minimum sound level for all existing fire alarms to comply with BS 5839.

- Manufactured in accordance with BS EN 1155
- Approved by Chief Fire Officers Association (CFOA)
- Endorsed by the National Care Homes Association
- Designed in line with the Disability Discrimination Act:

Improving access for wheelchair users
